

Index to Volume 16 of the Policy Studies Review

The following index of authors and subjects cover the issues of the 16th volume of the Policy Studies Review. Each page is designated by a volume number (which is an Arabic number in parentheses), issue number (which is an Arabic number in brackets), and a page number (an Arabic number). The issues cover a variety of professional developments or news and notes. The symposia include "The Impact of Collaborative Efforts," "Administrative Reform and Economic Development," and "Environmental Decision-Making."

The index of authors covers authors of articles, authors of books reviewed, and reviewers of books, but not names referred to in the articles. The index of subjects mainly covers the basic concepts included in the titles and subtitles of the symposia and articles, and the titles of the books reviewed. The bodies of the articles and book reviews were also consulted to clarify the concepts derived from the titles. The page numbers after each concept is generally the first page of the main page on which the concept is discussed. The discussion may be continued on subsequent pages as well. Future annual indexes will appear in the first issue of each volume to cover all issues in the previous volume.
